WINES AND SPIRITS WITH ATTITUDE

A unique authentic selection, from small refined producers to noble wine houses, crafted with true passion for quality.

We embrace a culture of passions reflecting the diverse beauty of terroir and exceptional craftsmanship.

WONDERLAND

1700+ wines and 800+ spirits for everyone, sourced from 27 distinct countries and spanning across 56 wine regions.

MINDFUL WINE PHILOSOPHIES

/ ORGANIC

*Limitation of total SO₂
Red 100 mg/L - White 150 mg/L
(value according to the European rules)*

Organic wines are made from grapes grown without any synthetic chemicals (fertilizers, pesticides, GMOs, herbicides...). The viticulture is dedicated to maintain and develop the ecosystem of the vineyard and the terroir. Since 2012, the winemaking process is also controlled with the limitation of technological processes and inputs that are used. Labeling according to European rules.

Les vins biologiques sont issus de raisins excluant toute utilisation de produits chimiques synthétiques (engrais, pesticides, OGM, herbicides...). La viticulture se consacre à maintenir et à développer l'écosystème du vignoble et du terroir. Depuis 2012, la vinification est également contrôlée avec la limitation des utilisations technologiques et des intrants autorisés. Labélisation suivant les règles européennes.

/ BIODYNAMIC

*Limitation of total SO₂
Red 70 mg/L - White 90 mg/L
(value according to the labeling organization)*

Biodynamic wines are made using practices and methods that go beyond organic rules. The viticulture is based on a deep reflection of the place of the vine around the components of the environment. It focuses on the astral and lunar cycles, the development of organism, magnetism, dynamization (spraying of plant and mineral preparations). The goal is to produce quality and perfectly healthy grapes to limit manipulation in the cellar and to faithfully express the terroir. The amount of technological process and inputs used, are significantly reduced. Controlled and certified by organizations.

Les vins biodynamiques sont élaborés à partir de pratiques et méthodes qui dépassent le cadre biologique. La viticulture se base sur une profonde réflexion de la place de la vigne autour des composants du milieu. Elle se concentre sur les cycles astro-lunaire, le développement d'organismes, le magnétisme, la dynamisation (pulvérisation de préparations de plantes et de minéraux). Le but étant de produire des raisins de qualité parfaitement sain pour limiter les manipulations en cave et exprimer fidèlement le terroir. L'utilisation d'intrants et de procédés physiques sont nettement réduits. Contrôlé et certifié par des organismes.

*Limitation of total SO₂
more or less 30 mg/L
(not recognized by European legislation)*

The consensus for the natural wine corresponds to a viticulture that follows the organic and biodynamic rules. A low-intervention is the principle in the cellar. Physical processes are reduced to a strict minimum, no inputs are allowed except for a homeopathic dose of sulfur, usually at bottling (30 mg/L total SO₂). The result is lively, free and unique wines. Despite the significant risks of production loss, these winemakers have chosen to always follow their values. The denomination "natural" is not recognized by European legislation. It does not follow any legal standard.

Le consensus pour le vin nature correspond à une viticulture qui suit les fondements biologiques et biodynamiques. Dans la cave, le principe est la non-intervention. Les procédés physiques sont réduits au strict minimum, aucun intrant n'est autorisé à l'exception d'une dose homéopathique de soufre généralement à la mise en bouteille (30 mg/L de SO₂ total). Il en résulte des vins vivants, libres et uniques. Malgré les risques importants de perte de production, ces vignerons ont fait le choix de toujours suivre leurs valeurs. Le terme « nature » n'est pas reconnu par la législation européenne. Il ne suit donc aucune norme légale.

PLEASE HANDLE YOUR NATURAL WINES WITH CARE!

They are highly sensitive to temperature and light and should be stored in a cool and dark area at 11-14 °C. Please note that we will not replace any natural wine bottles due to deterioration.

All of the *Zalto* products are suitable for dishwasher cleaning and gentle hand washing.

When washing by hand, make sure in advance that the work area offers sufficient space and that there is no danger of the glasses coming into contact with nearby objects.

The advantage of the dishwasher is that manual polishing, the most frequent cause of glass breakage, is not necessary. The exclusive use of a glass washing programme and an optimal setting of temperature, water hardness and rinsing chemistry must be ensured in order to avoid glass corrosion.

PERFECTION IN CRAFTSMANSHIP IS ZALTO'S GUIDING PRINCIPLE

That is why *Zalto* glasses have always been made from selected raw materials in elaborate traditional craftsmanship. The fine design of the glasses demands the utmost skill from the glassblowers. The handwork is reminiscent of the filigree artistry of Venetian glass artists of the Renaissance.

Developed with the aim of prioritising the perfect enjoyment of wine while allowing the glass itself to take a backseat through weightlessness. Relentless precision combined with an appreciation for wine reduces the glass to its essentials. Combining centuries-old craftsmanship with a modern, detailed aesthetic plus a featherweight feel with impressive functionality." (www.zaltoglas.at)

**THE WINE YOU WANT IN THE AMOUNT YOU WANT -
WITHOUT EVER PULLING THE CORK**

Coravin is the ultimate wine system. Other wine systems only delay the oxidation of the wine. With the Coravin wine system, however, you can pour wine without pulling the cork.
